

Abstract for ACHEMA '18

DEXPI – Data Exchange in the process industry - Commercial software releases für P&ID exchange become available

Stephan Kriebber, Covestro, Leverkusen/D

Thomas Lanzendorf, Air Liquide, Frankfurt/D

Manfred Theißen, AixCAPE e.V., Aachen/D

David Vazquez Landa, BASF SE, Ludwigshafen/D

Lars von Wedel, Bayer AG, Leverkusen/D

Michael Wiedau, Evonik Technology & Infrastructure GmbH, Marl/D

DEXPI, an initiative driven by the big owner operators BASF, Bayer, Covestro and Evonik, aims at solving the problem of lacking compatibility between CAE applications. For this purpose, DEXPI works in close cooperation with the leading CAE vendors, the international ISO community and research institutions on solutions based on ISO 15926. The first major milestone, a complete intelligent P&ID exchange, is now in reach: All necessary concepts and implementations are available.
