

## **Chemistry Powers Sustainability**

Presentation at ACHEMA 11.6.2018, Frankfurt

Dr. Christian Krüger, BASF SE, Corporate Sustainability Expert

### **Abstract:**

Global megatrends are requiring solutions for a sustainable development, where the chemical industry plays a key role. Therefore the chemical industry has established various sectorial initiatives on global, regional and national levels. A unique example for a national initiative is “Chemie<sup>3</sup>” in Germany - an alliance of associations and the union in order to lift the chemical industry to the next sustainability level. Starting from recent examples the current situation will be reflected. An outlook will be given how growth and sustainable development come together in the chemical industry.
